Description After upgrading to Debian Wheezy on the db1 server, MySQL would not start. The error from the syslog is: Mysql Error : ERROR 1 (HY000): Can't create/write to file '/tmp/MYkbo3BI' (Errcode: 13) In order to fix this reset the /tmp file permissions: <pre>sudo chown root:root /tmp sudo chmod 1777 /tmp sudo /etc/init.d/mysqld restart</pre>
