Assignee:	Daniel Curtis	**% Done:**	100%
Category:	Workstation	**Estimated time:**	0.10 hour
Target version:	*nix	**Spent time:**	0.50 hour

Description

Sometimes I am not online, but would like to continue viewing the contents of a webpage while offline. Chrome has a feature that stores a cached copy of the content to browse offline, but needs to be enabled.

Enable Show Saved Copy

- Open Chrome and in the URL bar enter chrome://flags/#show-saved-copy
- From the drop-down menu select Enable: Primary.
- Restart Chrome to apply the setting.
