GNU/Linux Administration - Bug #253

Error 500 While Connecting to ISPConfig Admin Panel

12/03/2013 10:44 AM - Daniel Curtis

Target version:		**Spent time:**	0.50 hour

Description

I recently made removed a duplicate UID on the primary hosting server, and as such I had to recursively change the user/group ownership of the ISPConfig folder:

```
sudo chown -R ispconfig.ispconfig /usr/local/ispconfig
```

However, after trying to access the ISPConfig admin panel I received an error 500. I managed to fix this up just running the update script:

```
/usr/local/ispconfig/server/script/update_from_tgz.sh
```

And sticking with the default selections.
