

FreeBSD Administration - Bug #331

Problem Starting A Jail After Creation

02/09/2014 03:50 PM - Daniel Curtis

Status:	Closed	Start date:	02/09/2014
Priority:	Normal	Due date:	
Assignee:	Daniel Curtis	% Done:	100%
Category:	Jails / Containers	Estimated time:	0.50 hour
Target version:	FreeNAS 9.x	Spent time:	0.50 hour
<p>Description</p> <p>I encountered a problem after creating a jail, I would go to open the Shell icon and the virtual shell screen on he web frontend would immediately close. I tried several times to Delete the jail and re- Create the jail, but that did not fix the problem. I decided open a Shell on the main FreeNAS web frontend, and go to the jail folder that was specified in the <u>Jail -> Configuration</u> and remove the jail cache:</p> <pre>cd /path/to/jails rm -rf .warden*</pre> <p>I closed out of the shell and went to re- Create the jail. This caused a new jail template to be downloaded, and this fixed the problem.</p>			

History
