Target version:	FreeNAS 9.x		**Spent time:**	1.00 hour

Description

I encountered a problem after deleting an unused VirtualBox template jail on FreeNAS. The error I came across happened when I tried to create a new VirtualBox jail, then immediately displayed the following error:

    ERROR: A template with this nickname already exists

After looking around on the Internet, I found someone on the PCBSD bug tracking system had the same problem and suggested deleting the warden template.

To resolve the problem I did the following:

- Log into the FreeNAS console and open up a shell on the web interface.

- Show all the ZFS zvols:

```
zfs list
```

- In my case I had to remove jails/.warden-template-VirtualBox-4.3.12:

```
zfs destroy -r jails/.warden-template-VirtualBox-4.3.12
```

- Remove remnant files:

```
rm -rf /mnt/jails/.warden-template-VirtualBox-4.3.12
```

Once this was done, I was able to create new VirtualBox jails.
