<b>Target version:</b>		<b>Spent time:</b>	0.50 hour
<b>Description</b>			
I encountered a problem while installing a required gem. The error, in short, displayed:  ERROR: Failed to build gem native extension.  /usr/bin/ruby1.9.1 extconf.rb creating Makefile  make sh: 1: make: not found  • The system I was running was Debian 7, I found that I just needed to install the basic development package:  <code>apt-get install build-essential</code>
