Description

I encountered a problem while pushing new commits to my GitLab server. I was able to access the web front end, so the problem was specifically happening with the gitlab-shell.

- When I ran the following:

```
git push origin master
```

- I got the following error:

```
/usr/local/lib/ruby/2.0/net/http.rb:878:in `initialize': getaddrinfo: hostname nor servnam
e provided, or not known (SocketError)
  from /usr/local/lib/ruby/2.0/net/http.rb:878:in `open'
  from /usr/local/lib/ruby/2.0/net/http.rb:878:in `block in connect'
  from /usr/local/lib/ruby/2.0/timeout.rb:52:in `timeout'
  from /usr/local/lib/ruby/2.0/net/http.rb:877:in `connect'
  from /usr/local/lib/ruby/2.0/net/http.rb:862:in `do_start'
  from /usr/local/lib/ruby/2.0/net/http.rb:851:in `start'
  from /usr/home/git/gitlab-shell/lib/gitlab_net.rb:103:in `post'
  from /usr/home/git/gitlab-shell/lib/gitlab_net.rb:28:in `check_access'
  from /usr/home/git/gitlab-shell/lib/gitlab_shell.rb:63:in `validate_access'
  from /usr/home/git/gitlab-shell/lib/gitlab_shell.rb:24:in `exec'
  from /usr/home/git/gitlab-shell/bin/gitlab-shell:16:in `'
fatal: Could not read from remote repository.
```

Please make sure you have the correct access rights
and the repository exists.

- It turns out that I had recently migrated my name server and forgot to add a proper DNS record for the GitLab servers hostname. Once I added the DNS record I was able to push commits again.
