

GNU/Linux Administration - Bug #621

Error Installing New Gems While Running Bundle Install

05/28/2015 12:03 PM - Daniel Curtis

Status:	Closed	Start date:	05/28/2015
Priority:	High	Due date:	
Assignee:	Daniel Curtis	% Done:	100%
Category:	Web Server	Estimated time:	1.00 hour
Target version:	*nix	Spent time:	1.50 hour
Description			
<p>I encountered an error while upgrading one of the ruby web applications I use, redmine in this case. The error happened when I ran bundle install after updating the webapp, and stated:</p> <p>You are trying to install in deployment mode after changing your Gemfile. Run `bundle install` elsewhere and add the updated Gemfile.lock to version control.</p>			
The Fix			
<ul style="list-style-type: none">I found a fix on a google groups thread, run the following to update the gem in no-deployment mode and then deployment mode: <pre>bundle install --without development test aws --path vendor/bundle --no-deployment bundle install --without development test aws --path vendor/bundle --deployment</pre>
