Category:		Estimated time:	1.50 hour
Target version:	Magento 1.9	Spent time:	1.50 hour

Description

This is a simple guide on how I setup FedEx shipping on Magento 1.9.

Developer API Credentials

- Log into the [FedEx Web Services](#)
- Click on **Develop and Test** and then **Get your test key** then fill out the [required form](#) and accept the [license agreement](#). An email containing the test user account information will be emailed to the accounts registered email address.
- When the test connection has succeeded, go ahead and click on **Move to production** and then click **Get production key** to obtain the required account information.

Setup FedEx API Connection

- Log into the Magento admin interface, <https://magento.example.com/admin>
- Go to [System -> Configuration](#) and click on **Shipping Methods**.
- Click **FedEx** to expand the settings panel.
 1. Enabled for Checkout: **Yes**
 2. Title: Federal Express
 3. Account ID:
 4. Meter Number:
 5. Key:
 6. Password:
- Click **Save** to apply the settings.

Once the production API connection has been setup, all orders will now have the shipping options provided by FedEx.
