Description

An ISO image is an archive file (a.k.a. disk image) of an optical disc using a conventional ISO format that is supported by many software vendors. ISO image files typically have a file extension of .iso; occasionally, you might come across a disc image in the .nrg(Nero) format.

nrg2iso

- Install nrg2iso:

```
sudo pacman -S nrg2iso
```

- Convert the .nrg disc image to .iso:

```
nrg2iso disc_image.nrg disc_image.iso
```

Mount .iso

- make a cdrom directory:

```
mkdir /media/cdrom
```

- Mount the .iso disc image:

```
sudo mount -o loop disc_image.iso /media/cdrom
```
