Target version:	FreeBSD 10	**Spent time:**	0.50 hour

Description

I recently needed to find how many of each filetypes existed in a given directory. This is the command I used to get the desired data.

- Find filetype usage in a given directory:

```
find /path/to/data/ -type f -and -print | egrep -io '\.[^.]*$' | sort | uniq -c | sort -rn
```
