Target version:	Debian	**Spent time:**	0.50 hour

Description

This is a simple guide for automatically logging as a user with an XFCE session on Debian.

- Edit the lightdm config file:

```
sudo nano /etc/lightdm/lightdm.conf
```

  - Uncomment these two lines and replace bob with your username:

```
autologin-user=bob
autologin-user-timeout=0
```

- Reconfigure the lightdm package so that changes are taken into effect:

```
sudo dpkg-reconfigure lightdm
```
