Description

This is a guide for upgrading Magento 1.9 from the command line on FreeBSD 10.

Before starting **make a full backup** of the magento directory and database.

- Turn on maintenance mode:

```
chmod -R 777 /usr/local/www/magento
cd /usr/local/www/magento
touch maintenance.flag
```

- Clear any session data and cache storage:

```
rm -rf var/cache/* var/session/*
```

- Get the list of currently installed modules:

```
chmod 550 ./mage
sudo -u www ./mage mage-setup .
sudo -u www ./mage config-set preferred_state stable
sudo -u www ./mage list-installed
```

- Start the upgrade:

```
sudo -u www ./mage list-upgrades
sudo -u www ./mage upgrade-all
```

- Reindex magento and set the file permissions back to normal:

```
sudo -u www php shell/indexer.php reindexall
chmod -R 644 ./*
find . -type d -exec chmod 755 {} \;
```

- Remove the maintenance flag:

```
rm -f maintenance.flag
```
