<div>Description</div> <p>This is a simple method for converting an MP4 video into multiple JPEG images of each frame. This was done on Arch Linux, but any machine running ffmpeg will work.</p> <ul style="list-style-type: none"><li>Convert MP4 to JPEG:</li></ul> <pre>ffmpeg -i input.mp4 -qscale:v 2 output_%03d.jpg</pre> <p><b>NOTE:</b> Change %03d to a higher number for larger frame counts.</p> <div>Resources</div> <ul style="list-style-type: none"><li><a href="http://softwarerecs.stackexchange.com/questions/19252/what-program-will-convert-video-frames-to-jpegs">http://softwarerecs.stackexchange.com/questions/19252/what-program-will-convert-video-frames-to-jpegs</a></li></ul>
