Target version:	Windows 10	Spent time:	1.00 hour
Description			
<p>After installing Windows 10 I tried to connect to a remote share. However an error came up with 0x8000405 and failed to connect. I then tried to map the remote share and this time the error came up with:</p> <p>You can't access this shared folder because your organization's security policies block unauthenticated guest access. These policies help protect your PC from unsafe or malicious devices on the network.</p> <ul style="list-style-type: none">• I found that I needed to edit the group policy by running the following command: <pre>gpedit.msc</pre> <ul style="list-style-type: none">• Navigate to <u>Computer Configuration\Administrative Templates\Network\Lanman Workstation</u>• Then select "Enable insecure guest logons" and set it to Enabled
