<b>Target version:</b>		<b>Spent time:</b>	0.50 hour
<b>Description</b>			
<p>I encountered a problem while setting up a PHP web application on an nginx web server. I managed to find a solution that increases the timeout values.</p> <ol style="list-style-type: none"><li>1. Open your nginx.conf file located in /etc/nginx directory</li></ol> <pre>vi /usr/local/etc/nginx/nginx.conf</pre> <ul style="list-style-type: none"><li>◦ Add this below piece of code under http { section</li></ul> <pre>client_header_timeout 3000; client_body_timeout 3000; fastcgi_read_timeout 3000; client_max_body_size 32m; fastcgi_buffers 8 128k; fastcgi_buffer_size 128k;</pre> <ol style="list-style-type: none"><li>1. Reload Nginx and php5-fpm</li></ol> <pre>service nginx reload service php5-fpm reload</pre> <p>If the error persists ( which is rare ), consider increasing the values.</p> <b>Resources</b> <ul style="list-style-type: none"><li>• <a href="http://www.codetweet.com/nginx/solved-504-gateway-timeout-error-in-nginx-web-server/">http://www.codetweet.com/nginx/solved-504-gateway-timeout-error-in-nginx-web-server/</a></li></ul>
