Description			
<p>While going to renew one of my SSL certificates, I came across an error that prevented me from logging into the StartCom Control Panel. The error stated:</p> <p>Secure Connection Failed An error occurred during a connection to auth.startssl.com. Peer does not recognize and trust the CA that issued your certificate. (Error code: ssl_error_unknown_ca_alert)</p> <p>The browser I use to administer my StartCom account is Firefox 34, and after looking around online I found a workaround.</p> <ul style="list-style-type: none">Go to <u>Preferences -> Advanced -> Certificates -> View Certificates -> Authorities</u>Scroll down to the StartCom Certificate AuthorityNow <u>Delete/Distrust</u> every certificate that is marked Software Security Device <p>Doing this allowed me to once again log into the StartCom Control Panel. Although I do not like the prospect of manipulating certificate authorities in the browser, I understand that StartCom recently changed one or more of their certificates, which will undoubtedly cause problems.</p> Resources <ul style="list-style-type: none">https://forum.startcom.org/viewtopic.php?f=15&t=2522&start=0&st=0&sk=t&sd=a&sid=8e35c7ce6440a09bf7e808e0444e579&view=print
