Description

I have recently started using IRC, and I have chosen WeeChat as my client. This is a quick start guide for using WeeChat:

- Install WeeChat:

```
sudo pacman -S weechat
```

- Launch weechat:

```
weechat
```

- Set the default username:

```
/set irc.server_default.nicks "JoeSchmoe"
```

- Show all of the IRC parameters:

```
/set irc.*
```

- Create a server connection profile called **geekshed** to irc.geekshed.net on port 6667:

```
/server add geekshed irc.geekshed.net/6667
```

- Connect to the geekshed profile

```
/connect geekshed
```

- Join a channel:

```
/join #somerandomchannel
```

- Display help:

```
/help
```
