Description

I encounter a problem with a newly created jail and pkg not being able to update. When I ran the following command:

```
pkg update -f
```

- I received the following message:

```
No active remote repositories configured.
```

The problem was that there wasn't a FreeBSD.conf pkg repo configuration. After creating a new repo config file, I was able to update again.

- Create the pkg repo config file:

```
vi /usr/local/etc/pkg/repos/FreeBSD.conf
```

- And add the following:

```
FreeBSD: {  
  url: "pkg+http://pkg.FreeBSD.org/${ABI}/latest",  
  mirror_type: "srv",  
  signature_type: "fingerprints",  
  fingerprints: "/usr/share/keys/pkg",  
  enabled: yes  
}
```
