Description

This is a simple guide on how I use ChatSecure with my local XMPP server for instant messaging.

Install ChatSecure

1. Install [ChatSecure](#) and open it.
2. Next enter in a master password and confirm it, this will be used to locally encrypt data.
3. Then swipe to the **Use Existing Account** screen and tap on **Add account**.
4. Enter in the [username@somedomain.com](#) and password for the account.
5. Now tap in the blank space to start a message and select another user to begin chatting.
