Description

This is a guide for setting up a basic Elasticsearch instance on FreeBSD 11.

Prepare the Environment

- Make sure the system is up to date:

```
pkg update && pkg upgrade
```

Install Elasticsearch

- Install Elasticsearch:

```
pkg install elasticsearch
```

- Make the config writeable:

```
chmod o+w /usr/local/etc/elasticsearch/elasticsearch.yml
```

- Edit the elasticsearch config:

```
vi /usr/local/etc/elasticsearch/elasticsearch.yml
```

- And modify the following parameters:

```
network.host: 127.0.0.1
```

- Start and enable Elasticsearch at boot:

```
sysrc elasticsearch_enable="YES"
service elasticsearch start
```
